

Промпт 1. По схеме КОМПОЗИТОР

Ты - проверяющий экзамена по английскому языку. (К)

Сейчас тебе предстоит проверить письменную часть этого экзамена, а именно эссе. (О)

Твоя задача - оценить эссе по шкале от 0 до 10 по критериям, которые я отправлю, ориентируясь, в том числе, на результаты оценивания других эссе реальным педагогом. Общая оценка складывается из подпунктов: 1) task response, 2) coherence and cohesion, 3) lexical resource and register, 4) register, 5) Grammatical Range and Accuracy.

Task Response (max 3 points):

0 points: the student does not adequately address any part of the task: there is no introduction, and/or there is no thesis statement in the introduction; the student presents some ideas in the body, which are largely undeveloped or irrelevant; there is no conclusion at all.

1 points: the student responds to the task only in a minimal way or the answer is tangential: the task in the introduction has not been paraphrased, the last sentence does not formulate a thesis statement; the topic sentences in the body paragraphs are difficult to identify and may be repetitive, the position of the author is not clear and is not supported by facts/statistics/examples/illustrations, more than one main idea is discussed in each body paragraph; in the conclusion the thesis statement is not properly paraphrased and does not clarify the position of the author, the conclusion contains some irrelevant ideas which are not discussed in the main body, a concluding signal is not used;

2 points: the student does not fully address all parts of the task: the task in the introduction is only partly paraphrased and ends with a clear thesis statement but it does not fully reflect the main idea of the essay; in the body the student addresses all parts of the task although some parts may be more fully covered than others, each paragraph discusses only one new point and begins with a clear topic sentence, there is 1 argument without any supporting details; in the conclusion some ideas may be missed in summarising, or the thesis statement is not adequately paraphrased, the conclusion does not contain any new/unrelated ideas or information;

3 points: the student fully addresses all parts of the task: the task in the introduction is fully paraphrased and ends with a clear thesis statement that states the main idea/position of the author; in the body the student presents a fully developed position in answer to the question, each paragraph discusses only one new point and begins with a clear topic sentence, each paragraph has 1–2 extended arguments with supporting details (facts, examples, statistics, etc.); the conclusion summarises the main points or paraphrases the thesis statement, begins with a concluding signal, does not contain any new/unrelated ideas or new information;

Coherence and Cohesion (max 2 points):

0 points: the student does not organise information and ideas logically, fails to use linking devices appropriately or repeats them, does not write in paragraphs.

1 points: the student writes a poorly structured essay, uses a limited number of linking devices, does not use paragraphing sufficiently; the ideas are not always logically organised

2 points: the student writes a clearly structured essay, uses a variety of linking devices which connect the ideas appropriately, uses paragraphing sufficiently, the ideas are logically organised;

Lexical Resource and Register (max 2 points):

0 points: – the student only uses basic vocabulary with very limited control of spelling, word formation or word choice; errors are numerous and impede understanding.

1 points: the student uses a sufficient range of vocabulary, but may make 1-2 mistakes in spelling, word formation or word choice;

2 points: the student uses a wide range of vocabulary, including some advanced lexical items; there may be 1-2 inaccuracies;

Grammatical Range and Accuracy (max 2 points):

0 points: – the student uses basic grammar structures or a limited range of structures and/or makes more than 2 grammatical mistakes, some of which impede understanding.

1 points: – the student uses a variety of grammar structures, but may make 2 mistakes;

2 points: the student uses a wide range of grammar structures and may make 1 minor mistake;

Register (max 1 point)

0 points: the style is inappropriate for the task; the register is informal: the student uses contractions, informal colloquialisms and idiomatic expressions, numbering or basic transitions to begin sentences, simple sentences, personal pronouns, imprecise wording.

1 points: the essay is written in an appropriate (academic/neutral) style: the student uses formal vocabulary and grammar structures, academic idiomatic expressions, impersonal language including passive voice where necessary and avoiding personal pronouns; the student may make a few minor stylistic errors. (M)

Эссе 1

Задание:

Some say that because some people are living longer the age at which they retire from work should be raised considerably. To what extent do you agree or disagree?

Ответ студента:

Some people argue that since life expectancy is increasing, the retirement age should be significantly increased. However, this essay completely disagrees with this statement because younger professionals are increasingly available to replace older workers and retirement is essential for maintaining health and well-being in later life.

Firstly, raising the retirement age is unnecessary due to the growing number of qualified young specialists entering the workforce. In other words, modern education systems are producing more graduates than ever before. As a result, extending the careers of older employees may limit job opportunities for younger generations. For example, recent university graduates often struggle to find employment in competitive fields such as technology and medicine, partly because experienced workers remain in their positions longer. Therefore, keeping retirement at an appropriate age helps maintain a balanced labour market.

Secondly, retirement plays a crucial role in protecting the physical and mental health of older people. The main reason is that ageing is associated with reduced energy levels and increased risk of illness, making full-time work more difficult and stressful. If elderly people continue to work under such conditions, it might negatively affect both their productivity and overall quality of life. For instance, many older adults who retire at the standard age report improvements in their health and emotional well-being, as they have more time to rest and spend time with family. Consequently, forcing people to work longer could harm their health rather than benefit society.

In conclusion, this essay strongly disagrees that the retirement age should be increased, because younger specialists need employment opportunities and retirement is essential for preserving the health of older individuals. Therefore, maintaining the current retirement age is more beneficial for both individuals and society.

Оценка: 10

Комментарий:

The essay fully addresses the task and presents a clear and well-developed position with relevant, extended, and well-supported ideas, with a clear and logical argument and well-defined paragraphs. Transitions are smooth and effective. A wide range of vocabulary is used accurately and appropriately although repetitively.

Эссе 2.

Задание:

We are becoming increasingly dependent on computer technology. It is used in business, crime detection and even to fly planes. What will it be used for in future? Is this dependence on technology a good thing or should we be suspicious of its benefits?

Ответ студента:

People's lives increasingly depend on computer technology. They help people in various areas of life. I think that it is useful for us to use new technologies and in the future they will work even better in the same areas where they work now.

The main advantage of using technology is that the quality of their work is constantly increasing. Most likely, in the future, computer technology will continue to be used in medicine, construction, but the quality of their work will improve. People should use technology, and not fight it. The fact that many factors depend on technology does not seem scary to me, I think that this shows the importance of technology. For example, at a plant they will set up a program for the manufacture of parts, if it breaks down, it will be a big problem, but without it, it would be difficult for people to work.

On the other hand, there are people who believe that computer technology ruins life. Because a person is smarter than a machine, and will do a better job.

In conclusion, computer technology is useful for a person and should not be feared. It will continue to develop in the areas where it works now, but will become better.

Эссе 3.

Задание:

«Consumerism has become a worldwide phenomenon. What are the advantages and disadvantages of this trend?»

Ответ студента:

It is a fact that nowadays we live in a hyper-consumer society. People all over the world buy and use more various goods than ever before. This essay will discuss both drawbacks and benefits of this trend.

It is understandable that this way of consumption is substantially beneficial. Positive impact on businesses and national economies all around the globe is probably the first and foremost merit of this trend. Since consumers buy great amounts of goods, proceeds bring a lot of money to different companies. As a result, national budgets are benefiting from it due to various taxes. One more major benefit worth considering is that purchasing goods gives a

person a real opportunity to have retail therapy. It means that a wide choice of wares allows you to buy whatever you want. Thanks to it, the stress level goes down.

On the other hand, there are obvious disadvantages to the cult of consumerism. The principle issue with this trend is excessive spending. Nowadays people often buy more goods than is required to meet their needs. Moreover, they frequently purchase even the things they do not need at all just because they have an opportunity to do so. The second downside to be mentioned is that consumerism is unconscious. Customers commonly do not think about the effect their actions make. Excessive buying leads to profound negative implications for our planet. Among them are littering, environmental pollution and so on.

To sum up, while consumerism is beneficial for business and the economy and allows to have retail therapy, it may lead to excessive spending and result in serious environmental problems. Having taken everything into account, I profoundly believe that this trend has more disadvantages since it not only hits our wallets but also threatens the life of future generations.

Since consumers buy great amounts of goods, proceeds bring a lot of money to different companies. As a result, national budgets are benefiting from it due to various taxes. One more major benefit worth considering is that purchasing goods gives a person a real opportunity to have retail therapy. It means that a wide choice of wares allows you to buy whatever you want. Thanks to it, the stress level goes down.

On the other hand, there are obvious disadvantages to the cult of consumerism. The principle issue with this trend is excessive spending. Nowadays people often buy more goods than is required to meet their needs. Moreover, they frequently purchase even the things they do not need at all just because they have an opportunity to do so. The second downside to be mentioned is that consumerism is unconscious. Customers commonly do not think about the effect their actions make. Excessive buying leads to profound negative implications for our planet. Among them are littering, environmental pollution and so on.

To sum up, while consumerism is beneficial for business and the economy and allows to have retail therapy, it may lead to excessive spending and result in serious environmental problems. Having taken everything into account, I profoundly believe that this trend has more disadvantages since it not only hits our wallets but also threatens the life of future generations.

Ознакомься с критериями проверки эссе по английскому языку:

Task Response (max 3 points):

0 points: the student does not adequately address any part of the task: there is no introduction, and/or there is no thesis statement in the introduction; the student presents some ideas in the body, which are largely undeveloped or irrelevant; there is no conclusion at all.

1 points: the student responds to the task only in a minimal way or the answer is tangential: the task in the introduction has not been paraphrased, the last sentence does not formulate a thesis statement; the topic sentences in the body paragraphs are difficult to identify and may be repetitive, the position of the author is not clear and is not supported by facts/statistics/examples/illustrations, more than one main idea is discussed in each body paragraph; in the conclusion the thesis statement is not properly paraphrased and does not clarify the position of the author, the conclusion contains some irrelevant ideas which are not discussed in the main body, a concluding signal is not used;

2 points: the student does not fully address all parts of the task: the task in the introduction is only partly paraphrased and ends with a clear thesis statement but it does not fully reflect the main idea of the essay; in the body the student addresses all parts of the task although some parts may be more fully covered than others, each paragraph discusses only one new point and begins with a clear topic sentence, there is 1 argument without any supporting details; in the conclusion some ideas may be missed in summarising, or the thesis statement is not adequately paraphrased, the conclusion does not contain any new/unrelated ideas or information;

3 points: the student fully addresses all parts of the task: the task in the introduction is fully paraphrased and ends with a clear thesis statement that states the main idea/position of the author; in the body the student presents a fully developed position in answer to the question, each paragraph discusses only one new point and begins with a clear topic sentence, each paragraph has 1–2 extended arguments with supporting details (facts, examples, statistics, etc.); the conclusion summarises the main points or paraphrases the thesis statement, begins with a concluding signal, does not contain any new/unrelated ideas or new information;

Coherence and Cohesion (max 2 points):

0 points: the student does not organise information and ideas logically, fails to use linking devices appropriately or repeats them, does not write in paragraphs.

1 points: the student writes a poorly structured essay, uses a limited number of linking devices, does not use paragraphing sufficiently; the ideas are not always logically organised

2 points: the student writes a clearly structured essay, uses a variety of linking devices which connect the ideas appropriately, uses paragraphing sufficiently, the ideas are logically organised;

Lexical Resource and Register (max 2 points):

0 points: – the student only uses basic vocabulary with very limited control of spelling, word formation or word choice; errors are numerous and impede understanding.

1 points: the student uses a sufficient range of vocabulary, but may make 1-2 mistakes in spelling, word formation or word choice;

2 points: the student uses a wide range of vocabulary, including some advanced lexical items; there may be 1-2 inaccuracies;

Grammatical Range and Accuracy (max 2 points):

0 points: – the student uses basic grammar structures or a limited range of structures and/or makes more than 2 grammatical mistakes, some of which impede understanding.

1 points: – the student uses a variety of grammar structures, but may make 2 mistakes;

2 points: the student uses a wide range of grammar structures and may make 1 minor mistake;

Register (max 1 point)

0 points: the style is inappropriate for the task; the register is informal: the student uses contractions, informal colloquialisms and idiomatic expressions, numbering or basic transitions to begin sentences, simple sentences, personal pronouns, imprecise wording.

Изучи примеры трех ответов студентов (написанных эссе по разным заданиям), для которых реальный педагог выставил оценку по шкале от 0 до 10 по критериям, которые я отправил ранее. Оценка и комментарии преподавателя абсолютно верны, не нужно с ними спорить. Вот сами задания, эссе и оценки:

Эссе 1

Задание:

Some say that because some people are living longer the age at which they retire from work should be raised considerably. To what extent do you agree or disagree?

Ответ студента:

Some people argue that since life expectancy is increasing, the retirement age should be significantly increased. However, this essay completely disagrees with this statement because younger professionals are increasingly available to replace older workers and retirement is essential for maintaining health and well-being in later life.

Firstly, raising the retirement age is unnecessary due to the growing number of qualified young specialists entering the workforce. In other words, modern education systems are producing more graduates than ever before. As a result, extending the careers of older employees may limit job opportunities for younger generations. For example, recent university graduates often struggle to find employment in competitive fields such as technology and medicine, partly because experienced workers remain in their positions longer. Therefore, keeping retirement at an appropriate age helps maintain a balanced labour market.

Secondly, retirement plays a crucial role in protecting the physical and mental health of older people. The main reason is that ageing is associated with reduced energy levels and increased risk of illness, making full-time work more difficult and stressful. If elderly people continue to work under such conditions, it might negatively affect both their productivity and overall quality of life. For instance, many older adults who retire at the standard age report improvements in their health and emotional well-being, as they have more time to rest and spend time with family. Consequently, forcing people to work longer could harm their health rather than benefit society.

In conclusion, this essay strongly disagrees that the retirement age should be increased, because younger specialists need employment opportunities and retirement is essential for preserving the health of older individuals. Therefore, maintaining the current retirement age is more beneficial for both individuals and society.

Комментарий:

The essay fully addresses the task and presents a clear and well-developed position with relevant, extended, and well-supported ideas, with a clear and logical argument and well-defined paragraphs. Transitions are smooth and effective. A wide range of vocabulary is used accurately and appropriately although repetitively.

Эссе 2.

Задание:

We are becoming increasingly dependent on computer technology. It is used in business, crime detection and even to fly planes. What will it be used for in future? Is this dependence on technology a good thing or should we be suspicious of its benefits?

Ответ студента:

People's lives increasingly depend on computer technology. They help people in various areas of life. I think that it is useful for us to use new technologies and in the future they will work even better in the same areas where they work now.

The main advantage of using technology is that the quality of their work is constantly increasing. Most likely, in the future, computer technology will continue to be used in medicine, construction, but the quality of their work will improve. People should use technology, and not fight it. The fact that many factors depend on technology does not seem scary to me, I think that this shows the importance of technology. For example, at a plant they will set up a program for the manufacture of parts, if it breaks down, it will be a big problem, but without it, it would be difficult for people to work.

On the other hand, there are people who believe that computer technology ruins life. Because a person is smarter than a machine, and will do a better job.

In conclusion, computer technology is useful for a person and should not be feared. It will continue to develop in the areas where it works now, but will become better.

Комментарий: This essay addresses the task only partially; the format is inappropriate in some places.

Эссе 3.

Задание:

«Consumerism has become a worldwide phenomenon. What are the advantages and disadvantages of this trend?»

Ответ студента:

It is a fact that nowadays we live in a hyper-consumer society. People all over the world buy and use more various goods than ever before. This essay will discuss both drawbacks and benefits of this trend.

It is understandable that this way of consumption is substantially beneficial. Positive impact on businesses and national economies all around the globe is probably the first and foremost merit of this trend. Since consumers buy great amounts of goods, proceeds bring a lot of money to different companies. As a result, national budgets are benefiting from it due to various taxes. One more major benefit worth considering is that purchasing goods gives a

person a real opportunity to have retail therapy. It means that a wide choice of wares allows you to buy whatever you want. Thanks to it, the stress level goes down.

On the other hand, there are obvious disadvantages to the cult of consumerism. The principle issue with this trend is excessive spending. Nowadays people often buy more goods than is required to meet their needs. Moreover, they frequently purchase even the things they do not need at all just because they have an opportunity to do so. The second downside to be mentioned is that consumerism is unconscious. Customers commonly do not think about the effect their actions make. Excessive buying leads to profound negative implications for our planet. Among them are littering, environmental pollution and so on.

To sum up, while consumerism is beneficial for business and the economy and allows to have retail therapy, it may lead to excessive spending and result in serious environmental problems. Having taken everything into account, I profoundly believe that this trend has more disadvantages since it not only hits our wallets but also threatens the life of future generations.
